Quality Components (UK) Ltd
- Your Profiling Service -

The Vision

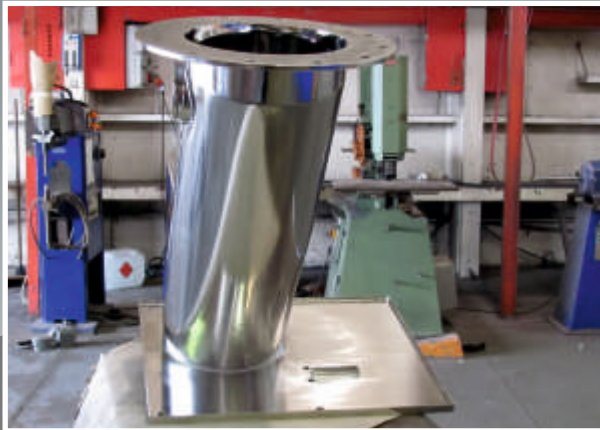

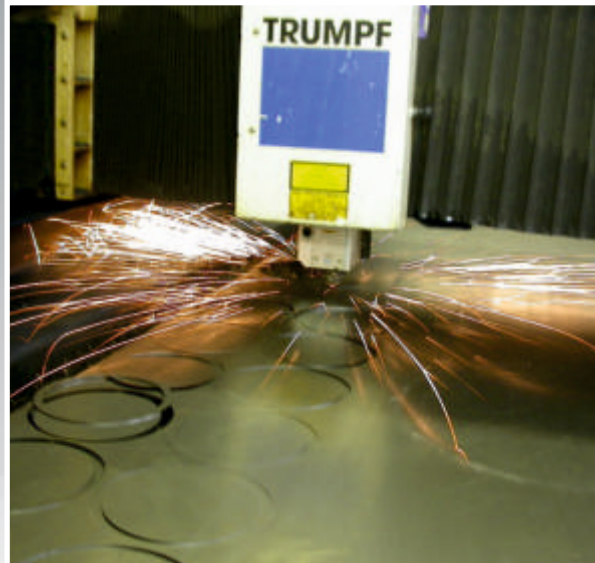

Starting 15 years ago Quality Components (UK) Ltd set out to break the mould of the established laser job shops where late delivery, poor customer service, poor quality and an indifferent attitude towards customers was common place in the industry.

Our vision was to create a first class service with a customer centric focus and that has seen Quality Components (UK) Ltd flourish. From the start Quality Components (UK) Ltd arranged drilling, tapping countersinking, plating, powder coating and machining where clients required additional secondary processes.

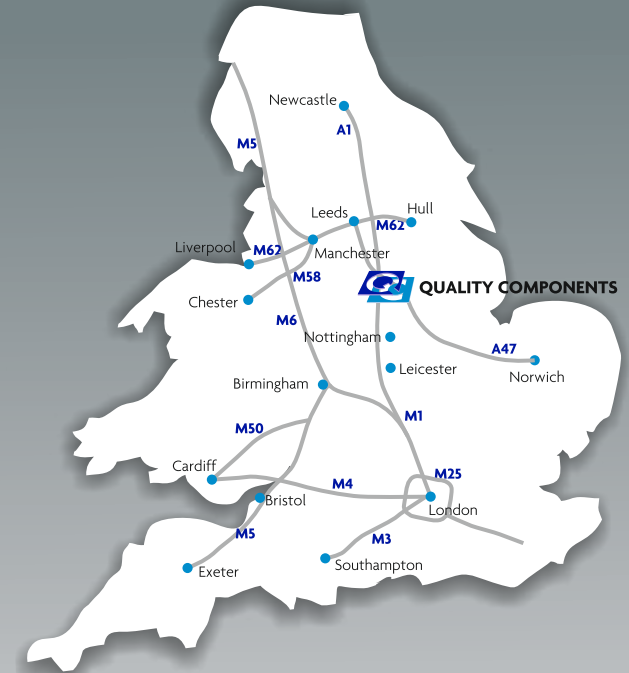

The Markets

Quality Components (UK) Ltd supply precision parts to a diverse range of industries including machinery, manufacture, shop fitting, office and commercial furniture, gasket manufacture, architectural metalwork, automotive, sign making and electronics as well as general engineering and sheet metal work. In recent years we have also moved into the Rail, Water, Nuclear and Renewable Energy markets.

Location

With our regional locations we are ideally positioned to serve a wide range of clients, and markets and with direct links to the motorway network we support the whole of the UK delivering on a next day overnight service.

Our People

Our staff are committed to excellence in product quality and customer satisfaction. We pride ourselves on our reputation as first-class providers of expert technical assistance, flawless customer service and on-time delivery of premium parts and components.
